Attn: Ms Judith Zahra

Dear Sirs

INTERNATIONAL APPLICATION NO. PCT/SG2003/000090 "EXTENSION SOCKET DEVICE WITH A CORD STORAGE AND DISPENSING SYSTEM" POWER BRIDGE (SINGAPORE) PTE. LTD., et al.

We refer to the Corrected Version of the PCT publication of the captioned chu Kuan Lee PCT application, a copy of which is attached for your easy reference.

We note that there has been an error pertaining to the details of the Applicant, Power Bridge (Singapore) Pte. Ltd. Please note that Power Bridge (Singapore) Pte. Ltd. should be the Applicant for all designated States except the United States of America as indicated in the Request filed on 17 April 2003. We believe there has been a typographical error in the said PCT publication stating that Power Bridge (Singapore) Pte. Ltd. is the Applicant "for US only". We would appreciate your immediate attention on the amendment of the same.

We look forward to receiving a re-corrected version of the PCT publication soonest possible for the purpose of National/Regional Phase entries (deadline for which are 18 October 2004 and 18 November 2004).

Thank you.

TERESA O'CONNOR

(54) Title: EXTENSION SOCKET DEVICE WITH A CORD STORAGE AND DISPENSING SYS

(57) Abstract: There is disclosed an extension socket device, electrically equipped with a plurality of socket units (15) and a cord storage and dispensing system. The present invention comprises a rectangular housing body (10) formed by two hollow parts, an electrical plug (22) and an extension cord (21). The larger hollow part of the housing body (10) comprises a top wall (11), two end walls (12) and two side walls (13). The smaller hollow part comprises a ring-like intermediate wall (17) and a bottom wall (14), wherein in the intermediate wall and a bottom wall, wherein the intermediate walland the bottom wall integrally form a working enclosure defining a working space for the wiring mechanism of the socket units (15). A receiving track of predetermined space is formed when the larger hollow part and the smaller hollow part are assembled together. The extension cord (21) of predetermined length in single file is fully retracted into the receiving track. A plurality of flexible retainer means is integrally provided along the bottom edge of the smaller hollow part. Each retainer means covers partially the opening of the receiving track. The cord storage and dispensing system comprises the receiving track and the flexible retainer means.
